3.6.10 Dimensions of the RG rail

The RG rails are used for both the RG and QR blocks.

3.6.10.2 Dimensions RGR_T (rail mounting from below)

Note:

1. The tolerance for E is +0.5 to - 1 mm for standard rails and 0 to - 0.3 mm for joints.
2. If the $E_{1/2}$ dimensions are not indicated, the maximum possible number of mounting holes will be determined under consideration of $E_{1/2}$ min.
3. The rails are shortened to the required length. If the $E_{1/2}$ dimensions are not indicated, these will be carried out symmetrically.
